

# I. Convex Analysis

V.M. Tikhomirov

Translated from the Russian  
 by D. Newton

## Contents

Preface .....	3
Introduction .....	4
1. What is Studied in Convex Analysis? .....	4
2. Duality and the Basic Operators of Convex Analysis .....	4
3. Finite-Dimensional Convex Geometry .....	11
4. Convex Calculus .....	15
5. A Brief Historical Sketch .....	19
List of Notations .....	22
Chapter 1. The Basic Ideas of Convex Analysis .....	24
§ 1. Convex Sets and Functions .....	24
1.1. Subspaces, Convex Cones, Affine Manifolds, Convex Sets .....	24
1.2. Linear, Convex Conical, Affine and Convex Hulls .....	26
1.3. Convex Functions .....	27
1.4. Operations Over Convex Objects .....	29
§ 2. Duality of Linear Spaces. Dual Operators of Convex Analysis .....	31
2.1. The Definition of Duality .....	31
2.2. Elementary Dual Relations .....	32
2.3. The Basic Operators of Convex Analysis .....	33
2.4. Examples .....	34
§ 3. Topological Properties of Convex Sets and Functions .....	37
3.1. Topology of Duality .....	37
3.2. Topological Properties of Convex Sets .....	38
3.3. Topological Properties of Convex Functions .....	38
3.4. Topological Properties of Finite-Dimensional Convex Objects	39
§ 4. Basic Theorems .....	40
4.1. The Hahn-Banach Theorem and Separation .....	40
4.2. The Krejn-Mil'man Theorem .....	42
4.3. The Banach-Alaoglu-Bourbaki Theorem .....	42
4.4. Appendix .....	42

Chapter 2. Convex Calculus .....	42
§1. Theorems on Involutiveness .....	43
1.1. Statement of the Theorems .....	43
1.2. The Proof of the Fenchel-Moreau Theorem .....	43
1.3. Some Relations Between the Basic Operators .....	45
1.4. The Proofs of Theorems 1 and 2 .....	46
§2. The Legendre-Young-Fenchel Transform .....	46
2.1. Statements of the Theorems .....	46
2.2. Proofs .....	47
2.3. Some Properties of the Legendre-Young-Fenchel Transform .....	48
2.4. The Conjugate Function of a Convolution Integral .....	48
§3. The Calculus of Convex Sets and Sublinear Functions .....	49
3.1. Tables of Basic Formulae .....	49
3.2. Proofs .....	50
§4. Subdifferential Calculus .....	51
4.1. The Simplest Properties of Subdifferentials .....	51
4.2. The Fundamental Formulae of Subdifferential Calculus .....	52
4.3. The Refinement Theorem .....	52
§5. Convex Analysis in Spaces of Measurable Vector-Functions .....	53
5.1. Introduction .....	53
5.2. Subdifferentials of Convex Integral Functionals and Their Applications .....	54
5.3. The Calculation of the Adjoint Functional $I_f^*$ .....	54
Chapter 3. Some Applications of Convex Analysis .....	55
§1. Linear and Convex Programming .....	56
1.1. Statements of the Problems .....	56
1.2. The Method of Duality in Convex Programming .....	57
1.3. The Fundamental Theorems of Linear Programming .....	58
1.4. Convex Programming .....	58
§2. Convexity in Geometry .....	59
2.1. Extremal Geometric Inequalities .....	59
2.2. Convex Geometry and the Approximation Theory .....	61
§3. Convex Analysis and Variational Problems .....	64
3.1. Lyapunov's Theorem and its Generalisations .....	64
3.2. The Existence of Solutions and Extensions .....	65
3.3. Duality of Variational Problems .....	67
3.4. Duality in Many-dimensional Problems .....	69
3.5. Appendices .....	72
Chapter 4. Extensions of the Sphere of Convex Analysis and Generalizations of Convexity .....	74
§1. Non-smooth Analysis .....	74
1.1. Introduction .....	74
1.2. Convexity and Differentiability .....	75

Preface	3
1.3. The Origin of Non-smooth Analysis. Clarke's Approach .....	76
1.4. Other Approaches .....	78
§2. Convexity and Order .....	79
2.1. Basic Definitions .....	79
2.2. Theorems on Extensions and Their Corollaries .....	80
2.3. The Subdifferential Calculus of Convex Operators.....	81
2.4. The Method of General Position .....	81
2.5. The Legendre-Young-Fenchel Transform .....	82
§3. Choquet Theory and Generalisations of Convexity .....	82
3.1. Introduction .....	82
3.2. Existence and Uniqueness Theorems .....	83
3.3. Other Generalizations of Convexity .....	84
3.4. Supremal Generators .....	84
Summary of the Literature .....	85
References .....	86
