

Application of Science in Examination of Works of Art

Editor: William J. Young

Proceedings of the Seminar:

June 15-19, 1970

conducted by the Research Laboratory

Museum of Fine Arts

Boston, Massachusetts

Table of Contents

Foreword	5	Application of the Laser Microprobe and Electron Microprobe in the Analysis of Platiniridium Inclusions in Gold	88
GEORGE C. SEYBOLT, President, Board of Trustees, Museum of Fine Arts, Boston, Massachusetts		FLORENCE E. WHITMORE, Senior Research Associate, Research Laboratory, Museum of Fine Arts, Boston, Massachusetts,	
Introduction	5	and	
WILLIAM J. YOUNG, Head of Research Laboratory, Museum of Fine Arts, Boston, Massachusetts		WILLIAM J. YOUNG, Head of Research Laboratory, Museum of Fine Arts, Boston, Massachusetts	
Neutron Activation Analysis of Streaks from Coins and Metallic Works of Art	9	An Examination of the Arsenic-Rich Coating on a Bronze Bull from Horoztepe	96
ADON A. GORDUS, Department of Chemistry, The University of Michigan, Ann Arbor, Michigan		CYRIL STANLEY SMITH, Institute Professor in Metallurgy, Massachusetts Institute of Technology, Cambridge, Massachusetts	
The Curator's Dream Instrument	18		
VICTOR F. HANSON, Coordinating Scientist, the Henry Francis duPont Winterthur Museum, Winterthur, Delaware		Joining Methods on Large Bronze Statues: Some Experiments in Ancient Technology	103
An X-Ray Fluorescence Method for Micro Samples	31	ARTHUR STEINBERG, Department of Humanities, Massachusetts Institute of Technology, Cambridge, Massachusetts	
MAURICE E. SALMON, Research Laboratory, Smithsonian Institution, Washington, D.C.		Salt Action on Stone in Urban Buildings	139
The Gilding of Metals in Pre-Columbian Peru	38	ERHARD M. WINKLER, Department of Geology, University of Notre Dame, Notre Dame, Indiana	
HEATHER LECHTMAN, Department of Humanities and Metallurgy and Materials Science, Massachusetts Institute of Technology, Cambridge, Massachusetts		Moisture in Monuments	147
Chemical Composition of Ancient Copper Objects of South America	53	B. H. VOS, Institute TNO for Building Materials an Building Structures, Delft, The Netherlands	
EARLE R. CALEY, Department of Chemistry, Ohio State University, Columbus, Ohio		Scientific Assistance in the Practice of Mural Conservation in Italy	154
A New Approach to Establishing the Authenticity of Patinas on Copper-base Artifacts	62	LEONETTO TINTORI, Palazzo Pitti Museo delle Carronze, Florence, Italy	
SEYMOUR Z. LEWIN, Department of Chemistry, New York University, New York, New York		Ancient Fresco Technique in the Light of Scientific Examination	164
Scientific Methods Applied to the Study of the Metallurgy of Antiquity at the Louvre	67	VALERIO MALAGUZZI-VALERJ, Soprintendenza alle Gallerie, Florence, Italy	
MADELEINE HOURS and F. MICHEL, Research Laboratory of the Museums of France, Louvre Museum, Paris, France		Deterioration Processes of Mural Paintings	170
New Directions in Lead Isotope Research	73	GIORGIO TORRACA, International Centre for the Study of Preservation and Restoration of Cultural Property, Rome, Italy	
ROBERT H. BRILL, the Corning Museum of Glass, Corning, New York		Investigation of Italian Frescoes, Their Materials, Deterioration, and Treatment	176
WILLIAM R. SHIELDS, National Bureau of Standards, Gaithersburg, Maryland		EDWARD V. SAYRE, Brookhaven National Laboratory, Brookhaven, New York	
and		Interim Report on an Investigation of Processes of Disintegration of Frescoes	182
i. M. WAMPLER, Georgia Institute of Technology, Atlanta, Georgia		LAWRENCE J. MAJEWSKI, Chairman, Conservation Center of the Institute of Fine Arts, New York, New York	
Applications of the Solid State X-Ray Detector to the Study Of Art Objects	84	Scientific Criteria in the Authentication of Antiquities	187
ROBERT E. OGILVIE, Professor of Metallurgy, Massachusetts Institute of Technology, Cambridge, Massachusetts		HAROLD BARKER, Research Laboratory, the British Museum, London, England	

Art and the Atom: Two Dating Methods Based on Measurements of Radioactivity	193
BERNARD KEISCH, the Mellon Institute, Pittsburgh, Pennsylvania	
Terminal Dates for Paintings Derived from Pigment Analysis	199
HERMANN KOHN, Head of Laboratory, Doerner Institut, Bayerische Staatsgemaldehysammlungen, Munich, West Germany	
Authenticity Testing of Art Ceramics by the Thermoluminescence Method—Some Important Examples	206
STUART J. FLEMING, Research Laboratory for Archaeology and the History of Art, Oxford, England	
Gas Chromatography and Pyrolysis Techniques to Establish Ageing Characteristics of Works of Art	213
NATHAN STOLOW, Director, Canadian Conservation Institute, National Museum of Canada, Ottawa, Canada, and GEORGE deW. ROGERS, Research Chemist, Canadian Conservation Institute, National Museum of Canada, Ottawa, Canada	
Recent Technical Studies of Works of Art in Japan	229
The Mural Painting of the Horyuji Temple, and Some Chinese and Japanese Glasses with High Lead and Barium Content KAZUO YAMASAKI, Department of Chemistry, Nagoya University, Nagoya, Japan	
Ageing of Wood: Preliminary Studies on Panel Paintings	235
G.STACCIOLI and UMBERTO TAMBURINI, Consiglio Nazionale delle Ricerche, Istituto del Legno, Florence, Italy	
Examination of the Ardagh Chalice—A Case History	238
ROBERT M. ORGAN, Head of Research Laboratory, Smithsonian Institution, Washington, D.C.
