Contents

Foreword to volumes 40 and 41 v
List of contributors vii

Chapter 1. The principles of skeletal muscle histochemistry in neuromuscular diseases – George Karpati 1
Chapter 2. Ultrastructural changes in diseases of human skeletal muscle – Hans E. Neville 63
Chapter 3. Physiological mechanisms of the nerve-muscle unit – R. Gruener 125
Chapter 4. Experimental myopathies – A review of experimental models and their relationship to human neuromuscular diseases – J.R. Mendell 133
Chapter 5. Normal and diseased human muscle in tissue culture – Valerie Askanas and W. King Engel 183
Chapter 6. The pathological reactions of the skeletal muscle fiber – K.E. Aström and R.D. Adams 197
Chapter 7. The classification of human myopathies – Theodore L. Munsat 275
Chapter 8. Clinical presentations in neuromuscular disease – Steven P. Ringel 295
Chapter 9. X-linked muscular dystrophies – Lewis P. Rowland and Robert B. Layzer 349
Chapter 10. Facioscapulohumeral and scapuloperoneal syndromes – James E. Carroll 415

Chapter 12. *Distal myopathy* – Rüdiger Kratz and Michael H. Brooke 471

Chapter 13. *Myotonic muscular dystrophy* –
Allen D. Roses, Peter S. Harper and Edward H. Bossen 485

Chapter 14. *Myotonic syndromes other than myotonic dystrophy* –
Raymond John Lipicky 533

Index 573
