Contents

Introduction	1
1 History	3
A Short History of the Diagnosis and Treatment of Cerebral AVMs	3
Pre-17th Century	3
17th-19th Century	3
Treatment of Extracranial AVM in Earlier and Present Time	5
Intracranial Angiomas	5
The Contributions of Virchow and his Contemporaries	5
Early Clinical Observations on Intracranial AVMs	6
Surgical Treatment of Cerebral AVMs (1889–1930)	7
Neurosurgical Approaches Prior to the Introduction of Angiography (1928)	9
Neurosurgical Treatment of Intracranial AVM Following the Introduction of Angiography (1930)	10
The Limitations of Surgery	12
Conservative versus Surgical Treatment	14
Summary and Outlook	20
Diagnosis	20
Surgery	20
2 Embryology	23
<i>Miguel Marin-Padilla</i>	
A. Embryogenesis of the Early Vascularization of the Central Nervous System	23
Introduction	23
Perineural Vascular Territory of the CNS Vasculature	24
Interneural Vascular Territory of the CNS Vasculature	31
Composition and Organization of the Pial Vascular Plexus	31
Vascular Perforation of the CNS Surface by Pial Vessels	32
Vascular Approach and Contact with the CNS Surface	32
Endothelial Filopodia Perforation of CNS Surface	32
In Situ Formation of New Intraneural Vessels	37
Establishment of the VRC and Interneural Vascular Territory	37
Intraneural Vascular Territory of the CNS Vasculature	39
Conclusions	44
B. Vascular Malformation of the Central Nervous System. Embryological Considerations	45
Capillary Telangiectasias and Cavernous Angiomas	46
Venous and Arteriovenous Malformations	46
Sturge-Weber-Dimitri's Disease	47

3 Pathological Considerations	49
Pathogenesis	49
Classification of Vascular Malformations ...	57
Nomenclature	57
Classification	58
The Author's Classification	61
Location of AVMs	63
Localization	63
Localization of the AVM Within the Brain ..	63
I. Surface Lesions (visible on exploration on the surface of the brain)	64
II. Deep Lesions (invisible at exploration on the surface)	64
The Nidus	73
The Concept of Compartments	74
Compact and Diffuse Lesions	76
Sizes, Shapes, and Elements of AVMs	85
Sizes of AVM	85
Shape	92
Pure Fistulous AVM	100
Elements of an AVM	111
Arterial Feeders	111
Venous Drainage	118
Sinuses	138
Enlargement, Growth, and Regrowth of AVMs	138
Enlargement	140
Growth	146
Pseudo-Growth	146
True Growth of the AVM	155
Spontaneous Thrombosis and Regression of AVMs	161
Multiple AVMs	165
Multiple Cerebral AVMs	165
Intracranial and Intraspinal AVMs	182
Association of Persistent Trigeminal Artery and AVM	182
Association of Aneurysm and AVM	182
Intracranial AVM with Stenosis and Occlusion of Major Vessels	190
Arterial	190
Moya-Moya Disease	192
Venous	193
AVM Associated with Other Pathological Entities	211
Tumors	211
4 Hemodynamics	213
Introduction	213
Hemodynamics	214
The Physics of Fluids and Blood Flow	214
Pressure, Flow, and Resistance	214
The Nature of Blood	215
Laminar versus Turbulent Flow	215
Tortuosity of Vessels	216
Vascular Distensibility	216
Cerebral Circulation: Functional Anatomy of the Cerebral Circulation	217
Neuronal Innervation	217
Microcirculation	218
AVM Structure	218
Enlargement of AVMs	218
Autoregulation	220
Normal Perfusion Pressure Breakthrough ..	221
Comments on the Normal Perfusion Pressure Breakthrough Theory	222
Effects of AVMs upon Cerebral Function ...	227
Local Mass Effect	227
Obstruction	227
Hemorrhage	227
Vascular Steal	228
Systemic Effects	235
Operative Considerations with Regard to Hemodynamics	237
Preoperative Evaluation	237
Operative Techniques	237
Postoperative Care	239

5 Diagnosis and Follow-up of Patients with Cerebral AVM using Doppler Ultrasound	240
<i>Herbert M. Keller</i>	
6 Neuroradiological Evaluation	250
<i>A. Valavanis</i>	
Computed Tomography	250
Magnetic Resonance Imaging (MRI)	259
Cerebral Angiography	260
Technique	260
Erroneous Findings	260
Angiographic Classification	267
Angiographic Investigation	269
Limitations of Conventional Selective Angiography	276
Venous Phase	280
Associated Aneurysms	280
Spasm	280
Summary	283
7 Microsurgical Anatomy of the Brain	284
Supratentorial Sulci and Fissures	284
Fissures	296
Interhemispheric (Longitudinal) Fissure	296
Sylvian Fissure	298
Transverse Fissure	301
Vascular Patterns Relating to Supratentorial Sulci	304
Infratentorial Sulci and Fissures	312
Organization of the Cerebral Microcirculation	320
The Venous System of the Brain	327
The Veins of Posterior Fossa	332
The Collateral Circulation	333
I Extracranial Arterial Circle	334
II Dural Arterial Circle	334
III Basal Cerebral Arterial Circle of Willis	334
IV Cortical Interhemispherical and Intrahemispherical Arterial Circle	334
V Cerebellar Arterial Circle	334
VI Transcranial Arterial Circle	334
VII Spinal Arterial Circle	336
VIII Vertebro-cervical Arterial Circle	336
IX Primitive Arterial Circle	336
Pathology of Collateral System	337
8 Cortical Blood Vessels of the Human Brain	338
<i>H. M. Duvernoy</i>	
Blood Vessels of the Cerebral Cortex	338
I Pial Vessels	338
The Pial Arterial Network	338
The Pial Venous Network	339
Pial Vessels: Discussion	340
Intracortical Vessels	340
Blood Vessels of the Cerebellar Cortex	345
I Pial Vessels	345
II Intracortical Vessels	347

9 Anatomy of the Calcarine Sulcus	350
<i>S. Kubik and B. Szarvas</i>	
Development	351
Nomenclature of the Various Parts of the Calcarine Sulcus	351
The Location of the Meeting Point	352
Anatomical Variations of the Pars Posterior .	352
Variations in the Terminal Part of the Pars Posterior	352
Side-Branches and Connections	355
Pars Anterior of the Calcarine Sulcus	356
Variations in Course	357
Connections and Side-Branches	357
Inner Structure of the Sulcus Calcarinus	357
Measurements	366
The Relationship Between the Sulcus Calcarinus and the Calcar Avis, Posterior Horn and Optic Radiation	366
References	369
Index	401
