FRANKLIN H. SILVERMAN
Marquette University

Research Design
In Speech Pathology
And Audiology

asking and
answering questions

Prentice-Hall, Inc., Englewood Cliffs, New Jersey  07632
CONTENTS

PREFACE xiii

part I
Introduction 1

ONE
NEED FOR RESEARCH IN
SPEECH PATHOLOGY AND AUDIOLOGY 3

Questioning and Clinical Effectiveness 4
Need for Systematic Observation in Answering Questions 5
Satisfying the Need for Systematic Observation 7
Questions and Answers 8
Has the Need Been Met? 11
References 11
TWO
RESEARCH AND THE CLINICIAN 13

Why be a Clinician-Investigator? 14
Who Can be a Clinician-Investigator? 20
References 25

THREE
RESEARCH AS A PROCESS
OF ASKING AND ANSWERING QUESTIONS 27

What is the Scientific Method? 29
The Scientific Method as a Set of Rules
for Asking and Answering Questions 43
References 44

part II
Asking and Answering Questions 47

FOUR
ASKING QUESTIONS
THAT ARE BOTH RELEVANT AND ANSWERABLE 49

Generating Relevant Questions for Research 51
Structuring Research Questions to Make Them Answerable 62
References 64

FIVE
SELECTING THE APPROPRIATE DESIGN
FOR ANSWERING SPECIFIC QUESTIONS 65

Differences Between Individual Subject
and Typical Subject Designs 67
Advantages and Disadvantages of Each Design 72
Variations Possible Within Each Category of Design 75
Which Type of Design Should You Use? 87
References 87

SIX
TYPES OF DATA 89
What are Data? 89
Types of Data 92
Measurement–Related Properties of Quantitative Data 97
References 107

SEVEN
APPROACHES TO GENERATING QUANTITATIVE DATA 109
Role of the Observer in the Measurement Process 109
Measurement Schemes Which Utilize an Instrument to Supplement Observer Judgment 113
Measurement Schemes That Rely Primarily Upon Observer Judgment: Psychological Scaling Methods 130
References 161

EIGHT
ORGANIZING DATA FOR ANSWERING QUESTIONS 165
Strategies for Organizing Qualitative Data for Answering Questions 166
Strategies for Organizing Quantitative Data for Answering Questions 170
References 215

NINE
CONSIDERATIONS IN INTERPRETING ANSWERS TO QUESTIONS 216
Dimensions to Consider When Evaluating Answers 217
Criteria for Evaluating Reliability, Validity, and Generality 222
References 227

TEN

COMMUNICATING QUESTIONS AND ANSWERS 228

Modes for Disseminating Research Findings 228
Objectives of Scientific Communication 231
Organization of Written Reports 233
Organization of Oral Presentations 238
Preparation of Written and Oral Reports 239
Locating Outlets for Speech Pathology and Audiology Research 240
Editorial Processing of Manuscripts 241
References 243

part III

Clinical Research Considerations 245

ELEVEN

ASSESSING THE EFFECTS OF THERAPIES 247

Choice of Presumption 247
Questions to Consider When Evaluating a Therapy 250
Research Design Considerations
    for Assessing the Effects of Therapies 252
References 269

TWELVE

ESTABLISHING A COMMUNICATIVE DISORDERS RESEARCH PROGRAM IN A CLINICAL SETTING 270

Achieving Administrative Support 270
Preparing a Research Proposal 271
Research Funding 274
Use of Consultants 275
References 276
Appendices 277

A

COMPUTATIONAL FORMULAS, WORKED EXAMPLES, AND EXERCISES FOR SELECTED DESCRIPTIVE AND INFERENTIAL STATISTICS THAT ARE PRACTICAL TO COMPUTE WITH A DESK OR SLIDE RULE CALCULATOR 279

Contents 279
References 326

B

TABLE OF RANDOM NUMBERS 327

GLOSSARY 336

AUTHOR INDEX 343
SUBJECT INDEX 346
